**Subject:** Proposed rehabilitation plan for land adjacent to the proposed hydro-electric generating station at the Bala falls  
**Attachments:** Concerns for proposed rehabilitation plan, 20161211.pdf

Dear Mr. Pink,

I have attached a letter in response to the Open House hosted last week by the proponent for the proposed hydro-electric generating station at the Bala falls.

The many signatories to this letter appreciate this opportunity to provide in writing the community's concerns that the proponent's proposed rehabilitation plan would bring both danger to the public and liability to the Township of Muskoka Lakes.

This letter is copied to Ministries and the members of Township Council, to emphasize and document that it is wrong to encourage and facilitate in-water recreation directly adjacent to the deadly and treacherously-turbulent water which would exit the proposed generating station.
