Subject: Ontario's deficit and the proposed hydro-electric generating station at the Bala falls

Premier Ford,

I have heard your government may sell OPG or the LCBO to reduce the Liberal's deficit.

This would be terribly short-sighted, especially since there is much wasteful spending to be eliminated first, such as stopping the proposed hydro-electric generating station at the Bala falls – this would save Ontarians at least \$70M dollars.

You have obviously been given incorrect information as at Troy's Diner on August 29, 2018 when you reneged on your promise to stop this proposed project you claimed this would cost millions of dollars. This is wrong, it would actually save millions of dollars. And stopping other unnecessary spending on electricity projects would save Ontarians billions of dollars.

Please reply, will you:

- Reduce wasteful government spending by stopping the proposed Bala project.
- Contact SaveTheBalaFalls.com to get the right information and suggestions on how this can be done without being sued.
